

Detailed Installation Guide (CPro Labs)

Windows

- Download MSYS2 installer from https://github.com/msys2/msys2-installer/releases/download/2024-12-08/msys2-x86_64-20241208.exe, run it, and don't change the installation directory unless you know what you're doing.
- After installation, check the "Run MSYS2 now" box, click Finish.
- Run `pacman -S --needed base-devel mingw-w64-ucrt-x86_64-toolchain` on the terminal that opens next.
- Press enter when asked to enter selection (default=all), then enter Y whenever prompted.
- "Edit environment variables for your account" (in start menu) > Open the result > Select "Path" variable > Click on Edit
- Edit environment variables:
 - Add the path of the fresh install to the variable (C:\msys64\ucrt64\bin), select OK, then OK
 - Close any open terminals/shells.
- Verify (on command prompt / PowerShell): `gcc --version`
- Download and install VSCode: <https://code.visualstudio.com>

Linux

- People are using Fedora mostly so use `dnf` instead of `apt` on the konsole (Ctrl+Alt+T):

```
sudo dnf install gcc
```

- Verify installation: `gcc --version`

- To install VSCode (Fedora):
 - Open konsole, run:

```
sudo rpm --import https://packages.microsoft.com/keys/microsoft.asc
```

```
echo -e "[code]\nname=Visual Studio Code\nbaseurl=https://packages.microsoft.com/yumrepos/vscode\nenabled=1\nautorefrsh=1\ntype=rpm-md\nngpgcheck=1\nngpgkey=https://packages.microsoft.com/keys/microsoft.asc" | sudo tee /etc/yum.repos.d/vscode.repo > /dev/null
```

```
dnf check-update
```

```
sudo dnf install code
```

- OR ELSE, download from <https://code.visualstudio.com/download> (.rpm / .deb depending on distro); double click on the downloaded file, click on "Install" in the window that opens.

macOS

- Clang has native support on macOS.

Run on terminal: `xcode-select --install`

- Verify installation: `clang --version`
- Download VSCode: <https://code.visualstudio.com/download>
 - Extract the .zip (double-click on the file), drag the revealed "Visual Studio Code.app" file into the Applications folder for ready access.
